## **DETAILED ACTION**

### ***Drawings***

1. Color photographs and color drawings are acceptable only for examination purposes unless a petition filed under 37 CFR 1.84(a)(2) is granted permitting their use as acceptable drawings. In the event that applicant wishes to use the drawings currently on file as acceptable drawings, a petition must be filed for acceptance of the color photographs or color drawings as acceptable drawings. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and, unless already present, an amendment to include the following language as the first paragraph of the brief description of the drawings section of the specification:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings have been satisfied.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Gray et al. (5,782,346). Gray '346 discloses a packaging or display device for packaging or

Art Unit: 3728

displaying a product that in use secures an object (razor 12), comprising a backing card comprising an object portion (surface 34) that stimulates the object, wherein the object portion and the backing card comprise a single piece of material, and wherein the object portion cooperates with the product (reflective/transparent platform 20 and projecting post structure 28) to secure the product to the backing card and to simulate the product securing the object when the product is used.

With respect to claims 2 and 3, note the product/ holder (20 & 28) which comprises a base and a pair of jaws and means to resiliently biasing and guiding the jaws (resilient fingers 26) to releasably hold an object (razor 12).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gray et al. (5,782,346) in view of Hansen (5,884,456). Gray '346 as described above discloses all the limitations of the claims except for the device further comprising graphics. Hansen '456 teaches that it is desirable to provide graphics on a packaging or display device to depict the object or the use of the product for the benefit of the consumer. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide graphics to the packaging or display device of Gary '346 as taught by Hansen '456 to provide product information to the consumer.

6. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gray '346. With respect to claim 7, since it has been held that mere duplication and rearranging of the essential working parts of a device involves only routine skill in the art. St. Regis Paper Co. V. Bemis Co., 193 USPQ 8 and In re Einstein, 8 USPQ 167.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are devices analogous to applicant's invention.
